

## TECHNICAL INFORMATIONS : BIOMEGA

### All the best for Dog's skin and hair

#### **Description.**

Nutritional supplement specifically designed to keep dogs' skin in good health and make their hair sheen. The high content of Biotin improves hair growing and the normal development of skin keratin, while Vitamin A is included in the right rate to carry on its trophic and protective activity regarding epithelial cells without risk of toxicity.

BIOMEGA formulation is enriched by sulphurated aminoacids, with high tropism for hair and keratin development, and by polynsaturated fatty acids that give to the product their well known functions nutraceutical, anti inflammatory and antipruritics.

Content of Zinc gives to the product dermoprotective function and enhances immune system activity.

#### **Indications.**

Co adjuvant in all the disorders of skin and hair like dermatitis-dermathosis, alopecia, dermatosis – dermatitis, hypercheratosis and pad lesions, cerumemosis otitis.

Co adjuvant in the treatment of Leishmaniosis.
