LEUCAGEL

From the Nature the Help for the Skin

LEUCAGEL is a new, innovative, dermatological gel, very useful for various skin lesions treatment. The original formulation of LEUCAGEL include Aloe Vera, Tea Tree Oil and Propolis. These ingredients give to the product a high antimicrobial action.

The content of several vegetal oils (Wheat germ, Thyme, Pine, Almond) increase antimicrobial properties of LEUCAGEL and enhance epithelial growth.

LEUCAGEL has showed to be very effective as adjuvant in the treatment of a lot of skin lesions in all the species.

LEUCAGEL can be easily applied, in a thin layer on the skin lesion, by the applicator syringe.

Use in the various Species.
