

TECHNICAL INFORMATIONS

FALCON B

Breeding

FALCON B is a nutritional supplement designed to stimulate reproduction of Falcons and other raptors and to increase their breeding performances.

The presence of high dosage of vitamin E, Carnitine and Arginine (important amino acid for the production of spermatozoa) make this product a good supplement for breeding season stimulation.

The formula contains Ginseng known for having a regenerating and tonic action on the body and for immune system stimulation activity.

FALCON B contains a high percentage of calcium which provides a proper forming of egg shell.

The content of Fructoligosaccharids in FALCON B formulation allows maintaining healthy the populations of beneficial intestinal flora such as *Lactobacillus* spp. and *Bifidus* spp. reducing potential invasion from opportunistic pathogens such as *E. coli* and *Candida albicans*.

Ingredients.

Sugars: Dextrose, Fructoligosaccharids, Maltodextrine, Rice starch.

Integrations (for Kg of product):

Vitamins: A (4.000.000 IU), D3 (6.000 IU), E (30.000 IU), K (400 mg), B1 (1.000 mg), B2 (1.600 mg), B6 (1.600 mg), B12 (9 mg), Niacine (1.200 mg).

Aminoacids: l-carnitine (20.000 mg), l-arginine (17.000 mg), l-lysine (8.000 mg), l-tryptophane (800 mg).

Minerals: calcium carbonate (50.000 mg), selenium (25 mg).

Herbal extracts: Ginseng (20.000 mg).

Guaranted analysis: Crude proteins 6,9%, crude fats 1,4%, crude fiber 0,4%, ash 0,4%, moisture 6%.

Suggested dose: put inside the food (eviscerated prey) half measuring spoon (1 gram) of the product per Kilogram of body weight before the breeding season. Best to start the treatment 2 months before supposed breeding time.

Stop to use the product once the eggs have been layed.

Package: box (100 gr).
