

TECHNICAL INFORMATIONS

FALCON M

Moulting.

FALCON M is a new formulation, very rich in aminoacids, specifically designed to improve feathers moult of raptors.

It can be used as daily nutritional supplement during moult of numerous species of raptors; regular use of FALCON M allows to have a better moult and to reduce moulting time of about 3-4 weeks less. FALCON M also contains all the essential vitamins and minerals Falcons need to maintain healthy during the stressing time of moult.

FALCON M has be also used with success as co adjuvant in the treatment of skin diseases and a lot of feathers' problems.

Alpha-alpha and Fenugreek extracts (herbs able to increase body growing and stimulate appetite) plus Carnitine make FALCON M a good supplement for chicks growing of many species of raptors. The content of Fructoligosaccarids in FALCON M formulation allows maintaining healthy the populations of beneficial intestinal flora such as *Lactobacillus* spp. and *Bifidus* spp. reducing potential invasion from opportunistic pathogens such as *E. coli* and *Candida albicans*.

Ingredients.

Sugars: Dextrose, Fructoligosaccarids, Maltodextrine, Rice starch.

Integrations (for Kg of product):

Vitamins: A (24000.000 IU), D3 (10.000 IU), E (10.000 IU), K (400 mg), B1 (1.000 mg), B2 (1.600 mg), B6 (1.600 mg), B12 (6 mg), C (17.0000 mg), H (80 mg), Panthotenic acid (3.000 mg), Folic acid (500 mg).

Aminoacids: l-arginine (6.000 mg), l-lysine (5.000 mg), l-coline (2.500 mg), l-methionine (3.000 mg), l-istidine (1.400 mg), l-leucine (3.000 mg), l-isoleucine (1.200 mg), l-phenylalanine (1.700 mg), l-threonine (3.000 mg), l-cystine (2.000 mg), l-valine (1.700 mg), l-triptophane (1.400 mg), l-aurine (2.000 mg), l-tyrosine (2.000 mg), l-carnitine (10.000 mg)

Minerals: calcium carbonate (12.000 mg), copper (50 mg), iron (1.000 mg), cobalt (40 mg), iodine (100 mg), zinc (500 mg), manganese (100 mg), magnesium (900 mg), selenium (10 mg).

Herbal extracts: Alpha alpha (20.000 mg), Fenugreek (30.000 mg).

Guaranted analysis: Crude proteins 3,5%, crude fats 1,9%, crude fiber 0,4%, ash 0,8%, moisture 7%.

Suggested dose: put inside the food (eviscerated prey) half measuring spoon (1 gram) of the product per Kilogram of body weight during the moulting time.

Package: box (100 gr).
