

TECHNICAL INFORMATIONS

FALCON POWER

Hunting and training

FALCON POWER is an original supplement specifically designed to increase Falcons' muscular power.

It contains Carnitine and Glycine to support liver functions and fatty acids metabolism, to reduce lactate production and to increase resistance to fatigue.

Sugars content of FALCON POWER is a source of quickly available energy, while coenzyme Q plays an important role in the production of energy at mitochondrial level and also acts as antioxidant.

FALCON POWER contains aminoacids with functions of metabolism stimulator, detoxifying and activating gluconeogenesis.

Minerals' content of FALCON POWER improves muscular cells contraction.

Gingko biloba extract improves blood flow to the brain and muscles, while Ginseng and Guarana extracts included in FALCON POWER act as tonic and make Falcons more active, allowing them to fly at higher body weight.

For the best results the use of FALCON POWER in association with FALCON TOP is recommended.

Indications.

Unique formulation of Falcon Power makes this supplement ideal for intensive training and hunting and in all the cases of increased request of energy by organism (diseases, rehabilitation, convalescence).

Ingredients.

Dextrose, Maltodextrine, Calcium lactate, Creatine, l-Carnitine, l-Arginine, l-Phenilalanine, l-Isoleucine, Ascorbic acid, Dimethylglycine, Ginseng extract, Gingko biloba extract, Guarana extract, Magnesium oxide, Potassium aspartate

Integration (mg/kg): Vit. E: 5.000, Vit. B1: 2.000, Vit. B5: 2.000, zinc: 500, Coenzyme Q10: 150. Selenium: 10.

Guaranteed analysis: Crude proteins 11%, crude fats 2%, crude fiber 0,4%, ash 0,5%, moisture 7%.

Suggested daily dose: put inside the food half measuring spoon (1 gram) of the product per Kilogram of body weight.

Package: box (100 gr).
