

PRODUCT INFORMATIONS

LEUCASPRAY

For Falcons' feet care

Falcon's foot pad is often injured by nails contact. The little lesions produced by talon allow introduction of various pathogens inside foot's tissues. This is the first stage of developing "Bumblefoot".

LEUCASPRAY is a specific product designed to prevent feet problems of Falcons and other Birds of Prey. Unique formulation of LEUCASPRAY include Propolis and Tea Tree Oil, well known as natural sources of antimicrobial agents.

LEUCASPRAY forms a thin layer on the skin and avoid germs penetration and its antimicrobial components act against pathogens contaminating raptors' skin.

Daily application of LEUCASPRAY under raptors' feet, easily applied by spray dispenser, after training, hunting or feeding, prevent feet infections.

Ingredients.

Water, Alcohol, Tea Tree Oil, Propolis, Glycerol.

Suggested use: gently spray raptors' feet after hunting, training and feeding.

Package: 250 ml bottle with spray dispenser.
