

PRODUCT INFORMATIONS

ORNICUMA S - GROWING AND MOULT

Nutritional supplement formulated for chicks growing and moulting.

Ornicuma S includes a well balanced blend of aminoacids, minerals and vitamins to give to the birds all the nutrients they need to support the delicate period of growing and new feathers development.

Ornicuma S includes Fenugreek and Alpha Alpha extracts able to stimulate appetite and give other important growing factors to organism.

It prevents birds feathers alterations.

Ornicuma S can be also used as co adjuvant in all cases of feathers diseases.

The content of Fructoligosaccarids in Ornicuma S formulation allows maintaining healthy the populations of beneficial intestinal flora such as *Lactobacillus* spp. and *Bifidus* spp. reducing potential invasion from opportunistic pathogens such as *E. coli* and *Candida albicans*.

Designed for Canaries, Finches, Psittacines.
